

SULM VALLEY WHISKEY

Whiskey
48%

Description:

As the name - Sulm Valley Whiskey - already suggests, this is probably our most regional product, as it is made mostly from an ancient corn variety which is grown especially for us in "Sulm Valley".

The whiskey matures only in new toasted cask from american white oak. This combination gives the product Sweetness as well as some smokey hints.

Due to the especially soft water from the Kor Alps the Whiskey opens itself - despite its 48% vol. - to whiskey experts as well as novices.

Nose:

Typical corn note paired with banana nests and sweet vanilla wood note.

Palate:

A mirror of the smell with a pleasant wood sweetness and a long finish.

Perfect serve: neat at room temperture
